

## JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove started on a cross country RV trip. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road trip.

Whilst on their trip, John spent time conversing with former business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John uncovered a considerable marketplace for a product that could quickly and safely lift individuals in the air to accomplish upkeep and other building services.

Upon returning from their travels, John formed a partnership with two friends and obtained a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they designed and sold the first JLG aerial work platform. The company incorporates some of the simple design essentials of that original lift into current versions.

JLG lift trucks have come a ways since Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. These days, the company proudly continues to expand itself into many marketplaces globally and develops new products to make sure consumers are capable of being more efficient and perform in the workplace within a safer atmosphere.
